

Turn every prescription into a managed digital order

A pharmacy-owned service for quotation, payment, pickup, and delivery - powered by EwaTrade.

THE OPPORTUNITY

Customers should not need to travel just to discover price and availability

Prescription demand reaches a pharmacy through many channels. Today, staff and customers often coordinate it through fragmented calls, chats, and physical visits.

For customers

Get a clear, pharmacy-approved quote remotely; pay ahead; choose pickup or an eligible delivery option; receive timely updates.

For the pharmacy

Create one visible queue for prescription intake, verification, quotation, payment, packing, handoff, and performance reporting.

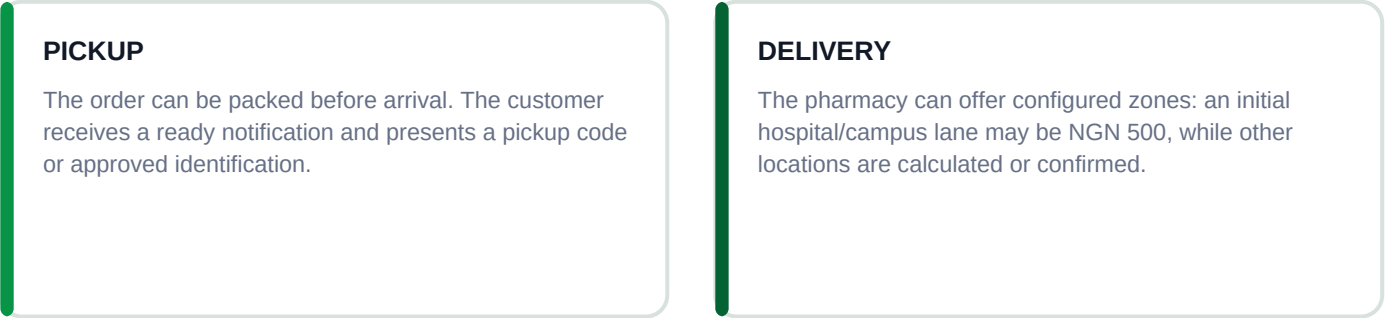

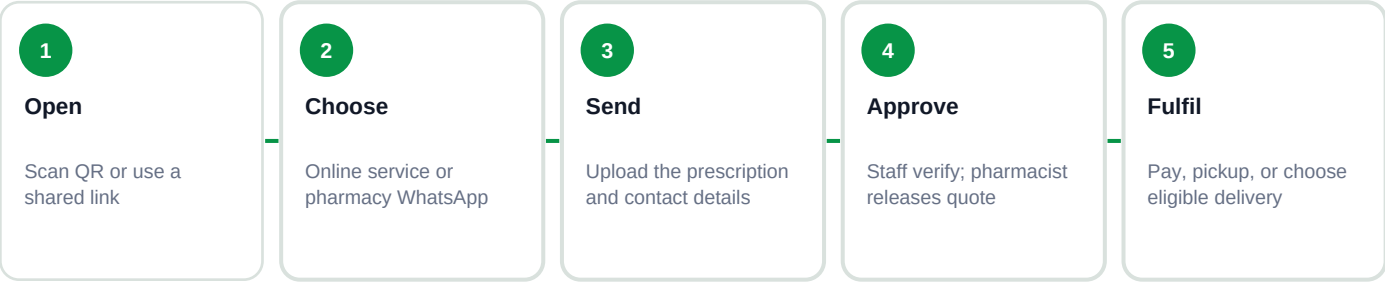

The same service can support prescriptions from:

- Nearby hospitals and clinics
- Doctors and diagnostic centres
- Distant hospitals within approved service lanes
- The pharmacy website, social pages, WhatsApp, and storefront
- Repeat customers, caregivers, and chronic-care refill workflows

HOW IT WORKS

A simple customer journey with professional controls behind it

The QR code or link opens a choice: continue online or continue in the pharmacy's WhatsApp chat.

Delivery eligibility and fees remain configurable by the pharmacy and can reflect distance, item type, operating hours, courier availability, and regulatory policy.

AI WITH ACCOUNTABILITY

Faster transcription without surrendering professional judgment

OCR helps reduce retyping. It is never the final authority.

Image check

The service checks capture quality and requests a clearer image when needed.

OCR draft

The system extracts likely prescription lines and highlights uncertainty.

Line-by-line check

An attendant compares every generated line with the original image and corrects any difference.

Pharmacist release

A licensed pharmacist handles clarification, alternatives, restrictions, approval, and dispensing controls.

The system does not diagnose, prescribe, or automatically substitute medicine. The pharmacy remains accountable for professional review, sale, and dispensing.

COMPLETE SERVICE

Everything required to manage the order from first contact to handoff

EwaTrade connects the customer-facing experience to the pharmacy's operating queue.

Intake

QR, web link, WhatsApp, mobile capture, image/PDF upload, consent and contact.

Verification

Image quality, OCR draft, line correction, audit history, exception queue.

Quotation

Availability status, itemised price, partial quote, clarification, validity and alternatives.

Payment

Accept quote, payment link, receipt, reconciliation, cancellation and refund handling.

Pickup

Packing queue, ready notification, pickup code, authorised collector and handoff record.

Delivery

Zones, fees, eligibility, dispatch assignment, tracking, proof and failure handling.

Operations

Staff roles, ownership, timers, templates, escalation, branch and channel configuration.

Management

Conversion, turnaround, availability, reliability, revenue and source analytics.

BUSINESS VALUE

A better experience that also improves operational visibility

The partnership is designed around outcomes the pharmacy can measure.

Convert more demand

Capture prescriptions before customers travel or buy elsewhere.

Reduce avoidable waiting

Quote and pack before pickup, with clearer promises and status.

Control every handoff

See who verified, approved, packed, assigned, and completed each request.

Extend service reach

Offer selected delivery zones without making every location a universal promise.

Learn what drives sales

Measure sources, availability, quote time, conversion, delivery choice, and failures.

Build lasting customer trust

Use transparent quotes, pharmacist oversight, reliable updates, and traceable resolution.

DESIGN-PARTNER PILOT

Start controlled, learn quickly, and protect normal pharmacy operations

The pilot is configured with the pharmacy team and expands only after agreed service and safety gates.

Discover	Map current prescription channels, responsibilities, stock workflow, customer questions, delivery rules, and compliance requirements.
Configure	Launch QR/web/WhatsApp intake, verification queue, pharmacist quote, pickup, and selected delivery lanes.
Operate	Run a controlled set of real requests with staff support, daily exception review, and clear escalation.
Measure	Review conversion, quote time, ready-on-promise, workload, customer feedback, stock coverage, safety, and privacy.
Decide	Agree the production scope, integrations, commercial terms, service levels, and rollout sequence.

PARTNERSHIP ROLES

Clear ownership keeps the service safe and commercially credible

The operating and regulatory model is confirmed before production launch.

The pharmacy

Provides executive sponsor, licensed pharmacist oversight, catalogue and pricing authority, prescription and substitution policy, dispensing, packing, refund approval, and delivery eligibility rules.

EwaTrade

Provides product configuration, intake channels, workflow, transcription assistance, ordering and payment orchestration, customer updates, fulfilment coordination, reporting, training, and technical support.

Production readiness includes:

- Approved PCN/electronic-pharmacy role and licence pathway
- Documented privacy roles, retention, access, deletion, and incident response
- Managed private prescription media storage and audit logs
- Delivery SOP and exclusions for restricted, controlled, cold-chain, or unsuitable items
- Staff training, service levels, fallback procedures, and management reporting
-

NEXT STEP

Approve a discovery workshop and pilot design

The immediate goal is a jointly approved operating blueprint - not a premature technology rollout.

WORKSHOP OUTPUT**90-120 MINUTES**

Current-state map, target customer flow, staff roles, service zones, compliance questions, integration scope, pilot cohort, measurement plan, and decision calendar.

Suggested participants

- Owner or executive sponsor
- Superintendent or pharmacist lead
- Branch/operations manager
- Customer service or WhatsApp owner
- Finance/POS or inventory owner
- Privacy/legal representative
- Dispatch or delivery owner
